

Here are three different worksheets to help you record about your rocks. The first is a lower level form your child could fill out for each rock you want to learn about. The second is the same for an older child. You can print as many of these as you would like to use. The last page is for a chart of several different rocks. I also added the acid test on here. You can learn about the characteristics I chose to put on there using the info links under "Rocks" on the "Earth Science" page on homeschoolfreestuff.wordpress.com (where you got this!)

Please do not use this for commercial purposes but please do share it. It's OKAY to email it or photocopy it. It's made to be used. :)
